The Ultimate Geek Gift Guide (continued)

THE COLD SHOULDER

Weekend warriors in need of a little TLC can now join the big leagues. Game Ready's portable cold compress is standard rehab equipment for pro football players — like Jerry Rice. Fill the console with ice to soothe ankles, elbows, knees, and shoulders. Choose from four pressure settings, and monitor temperature via a digital readout. Game Ready Injury Treatment System: \$2,500-3,700 (depending on the number of compression wraps), www.gameready.com.
